Stephen Hankinson
Group Chief Executive

The Hankinson Painting Group has a history spanning back to 1975 when it was founded by the current President, Roy Hankinson. The Company is now run by Stephen Hankinson, son of the Founder and supported by a dynamic Management Team.

The Group has expanded both organically and by acquisition in recent years and now incorporates Roy Hankinson Limited, Whittle Programmed Painting Limited and EPIC Painting Limited. Each Company has added to the skills and services that the Group has to offer.

The Group is now one of the largest Independent Painting Contractors in Great Britain and has the expertise to deal with projects presented to us from whatever industry or sector.

All Group Companies work hard to ensure that health and safety, environmental and quality management systems and standards are best in class and we are committed to exceeding the expectations of our clients. This has been recognised by our clients, enabling us to build an impressive award winning reputation.

The Company was recognised in 2013 in a report by the London Stock Exchange as one of the top 1000 SME's to Inspire Britain

Services

Commercial Painting & Decorating

Inclusive of a comprehensive range of traditional services.

High Class Decorations

Inclusive of Specialist Decorative Finishes.

Painting Programmes

Inclusive of Long Term Maintenance Programmes with Structured Payments.

Hygienic and Environmental Coatings

Inclusive of Hygienic Coatings for walls and floors and Containment Systems.

Industrial Coatings

Inclusive of Steelwork Preparation, Protective Coatings, Tank Coatings and Thermal and Insulating Coatings.

Factory Facility

Providing a facility for an extensive range of services for preparation and coating off-site.

Commercial Painting and Decorating

As one of the largest Commercial Painting Contractors in the UK we provide a national service and have been maintaining iconic UK sites since 1975.

We offer a comprehensive range of services:-

All kinds of interior and exterior projects	
Prior to paint repairs	Response maintenance
Paper Hanging	Factory shutdown Specialist
Wall and Floor Coatings	Working at Height

Our staff are amongst the most experienced and professional in their field.

Wide Ranging Experience

We have experience of working for a diverse range of clients on a diverse range of projects from small specialist projects to £M plus new construction projects. We are recognised for adding value to the supply chain with our commitment to excellence in all we do.

Health, Safety, Environmental and Quality

Our commitment is industry leading and recognised with formal accreditation in all key areas with ISO9001, ISO14001 and Investors in People. The Company is committed to the CSCS Scheme and hold Platinum Standard confirming that 90% of its workforce has achieved the required standard.

Industry Accreditation

The Company is accredited under Constructionline, CHAS, SAFEContractor and is a Dulux Contractor Partner and has won a host of industry awards.

Comprehensive Technical Support

We work with all the leading paint manufacturers and can provide technical support including specification and interior design development to tailor a painting solution.

High Class Decoration

Hankinson have a wealth of award winning experience in providing high class decorations inclusive of specialist decorative finishes on both historic and modern buildings. We have a large team of highly skilled decorators and artists who work on projects of any size both restoration and new construction.

Our specialist areas of expertise include:

- High Class Decoration
- Gilding
- Stencilling
- Fabrics
- Trompe l'Oeil
- Marbling & Graining
- Paint Effects

We work closely with clients and their advisors and if required we assist in historic paint finish research to ensure the right specification is developed. Our work on redecoration of the Small Concert Room of St. George's Hall in Liverpool, a building that first opened its doors in 1854 has won many prestigious awards including the Decorative Contract of the Year in the Painting and Decorating Association Awards and Supreme Award in the Johnstones Painter of the Year. Restorative work is very important to maintain the structural integrity and historical features of a building. Our work is completed to impeccable standards, sensitively to ensure the work is in keeping with a building's unique heritage.

High Class Decoration

Specialist Services

Hankinson Painting Group has extensive experience in a wide range of traditional painting and restoration techniques. Using these techniques, our Specialist Decorations Team can both create and conserve decorations.

Historic Interiors

Our most accessed service within Specialist Decoration is for the restoration and conservation of historic interiors. Often these involve a combination of surfaces including paint, mosaic, stone and gilding. We use traditional techniques with modern materials to restore to the highest standard and ensure the finish will last for many years to come.

Key Techniques

Water Gilding

While typically used on furniture, this is occasionally found on some architecture. Water Gilding involves layering gesso which is carved and flattened until the surface is hardened and shiny. Gold leaf is then applied to the damp gesso and this is drawn in. Once dried, the gold is burnished to create a stunning finish.

Oil Gilding

As the most common technique used for gilding we are frequently asked to restore interiors that have extensive oil gilded interiors. The surface that is to be gilded is carefully prepared and then gold leaf is applied to the slightly adhesive surface. The Gilder generates a small static charge in the bristles of his tool and this is used to pick-up the gold leaf. A long handled brush is then used to loosen excess flecks of leaf and then the gold is polished to a perfect finish.

Trompe l'Oeil

A trick of the eye is the literal translation from French of Trompe l'Oeil - they are painted illusions which deceive the viewer. These intricately painted decorations have been popular since Renaissance and they help create a sense of space and light to enhance architecture.

Lime & Gypsum Plaster Conservation

Decorative plasters are often at high risk of degrading. We undertake projects to clean, reinstate and also remodel plaster using traditional moulding and casting techniques. New materials are often used to improve the lifetime and integrity of the work.

Marbling

Marbling is the effect of creating marble using paint (despite marble being readily available). Marbling is a complex process as it involves creating depth and translucency by building up layers of precisely graded pigments. Painted marble offers the advantage of being consistently toned in comparison to natural marble.

Painting Programmes

Painting Programmes With Structured Payments

Developed and refined over a period of five decades, our long-term maintenance painting programmes are an effective way for customers to achieve a high standard of presentation for their properties, while avoiding a large initial cost outlay. Our emphasis is directed toward the type of paint finish and the scope of annual services to ensure that the paint work is kept in a sound condition and that total protection is offered to the building structure.

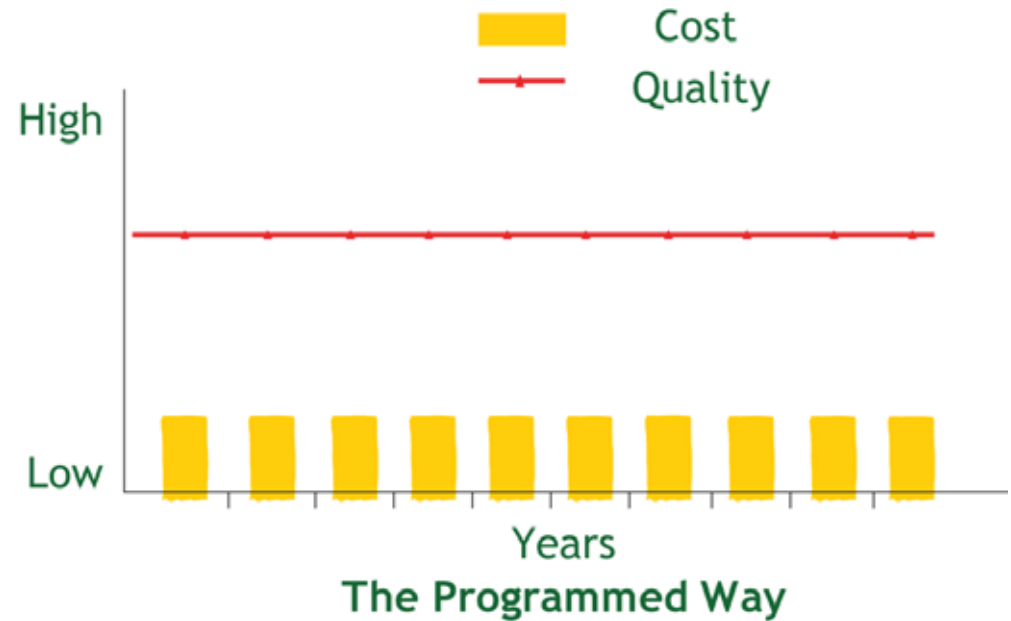

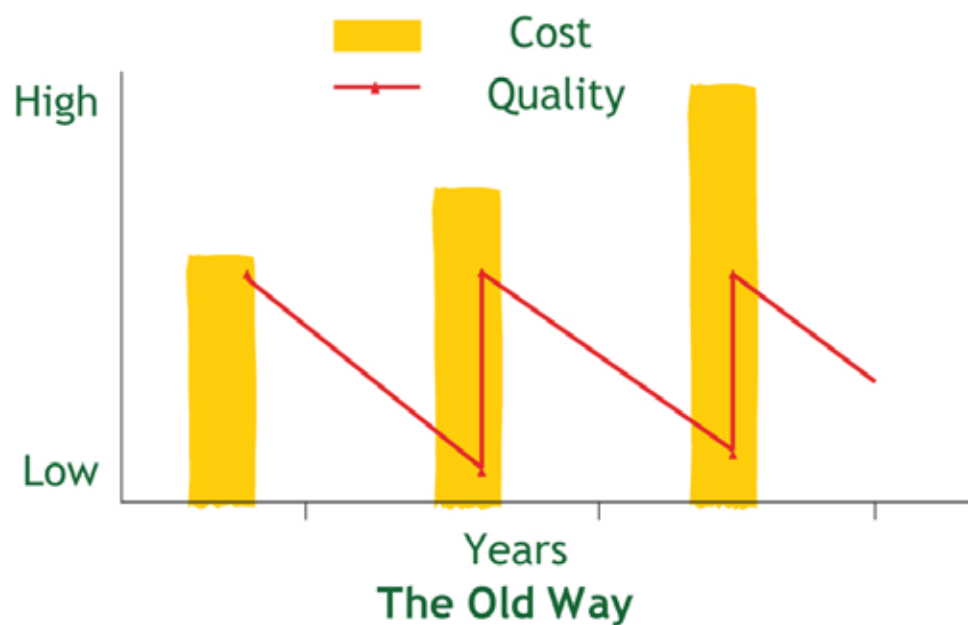

In the first year of the programme all of the nominated surfaces are prepared and repainted to establish uniformity of finish and appearance. Buildings that are new or recently painted may be deferred for painting to later years of the programme to provide overall cost savings. Annual maintenance servicing extends the life cycle of the coated surfaces.

A unique financial guarantee is provided by spreading payments over the period of the maintenance programme, even though the majority of the work may be completed in the first year. All maintenance programmes are flexible and can be modified to suit the changing needs of our customers.

The major benefits of maintenance programmes are many, including:

- Costs are spread over the agreed contract period.
- Annual appraisal and regular attention to surface protection.
- Constant high standard of appearance.
- Simple budgeting.
- Major long term problems are prevented before they start therefore saving future costs.
- The agreement is flexible and areas can be added or deleted and can be cancelled at any time.

We are the market leaders in the UK with over 500 active painting programmes and frequent repeat business.

"The planned model works exceptionally well for us in terms of managing both our budget and our long term needs for maintaining our buildings. In taking this approach I have guaranteed peace of mind that our buildings are being taken care of, allowing me to focus on the broader school operation."

Pauline Scrivener
School Business Manager
Lode Heath School and Sports Club

Hygienic and Environmental Coatings

Hankinson Painting Group has a Division that specialises in the supply and installation of High Performance, Hygienic and Containment Coating Systems providing impact resistant, durable and cleanable wall, ceiling and floor coating systems. All systems provide specific lifecycle benefits. We are one of the UK's top Specialists and have completed a number of high profile projects including clean production areas (medical, operating theatres, food, research and leisure).

Wide Ranging Experience

Healthcare
Pharmaceutical
Food and Beverage
Prisons

Education Sector
Retail
Leisure
Chemical

Comprehensive Technical Support

We work with all key proprietary manufacturers including CS Wallglaze and can provide comprehensive technical support including specification and development. We have experience of offering cost effective and fast track coatings and surface protection solutions to suit a diverse range of operating environments.

Accreditation

We are Preferred Applicators for all leading manufacturers and offer a trained and experienced team.

Testimonial:

'As Premier Approved Applicators Hankinson ensured that the quality of application satisfied the complex design brief. The result was a first class project providing robust and aesthetically pleasing finishes in all areas. We look forward to future projects with the Hankinson team.'

Ian Hancox

Product and Technical Manager, CS Group

Steelwork Preparation

Hankinson have been carrying out Surface Preparation and Painting work since 1975. We possess the expertise, resources and equipment to meet any requirement.

We can provide numerous types of surface preparation to any type of structure, this may include:-

- Grit Blasting
- Damp Blasting
- Sand Blasting
- Sponge Blasting
- Bead Blasting
- Water Jetting
- Ultra High Pressure Water Jetting
- Mechanical Preparation
- Hand Preparation
- Chemical Solvent Cleaning
- Heat Induction Removal
- JOS (Swirling vortex system cleaning Torc system)
- DOFF (high pressure steam cleaning)
- Graffiti Removal

Wide Ranging Experience

Bridges and other waterway structures, tank farms, petrochemical plants, railway system infrastructure.

Comprehensive Technical Support

Coatings, surveys and analysis, coatings specification development, assessment of hazardous or toxic substances.

Accreditation

Qualified under Industrial Coatings Applicator Scheme (ICATS) approved by Correx Ltd and Institute of Corrosion. We have in house Trainers. In addition, we have ICORR certificated Paint Inspectors.

Full Support Services

Encapsulation and environmental protection, traffic management systems, industrial cleaning systems.

The Group holds the National Highways Sector Scheme 19A Corrosion Protection of Ferrous Materials by Industrial Coatings accreditation (NHSS19A).

Industrial

Protective Coatings

The successful painting and refurbishment of large structures such as road and rail bridges, tank farms and other metallic surfaces requires specialist technical knowledge, application skills and project management capabilities.

Our expertise in anti-corrosion coatings technology has enabled the Company to secure many prestigious and demanding painting contracts including bridges, industrial sites and petrochemical complexes.

Turnkey management solutions include pre-survey work, through life coatings specification, grit blasting and UHP water jetting, surface preparation and high quality coating systems application.

A full service protective coatings capability provides clients with clear advantages in project planning, control and cost – with effective safety, quality and contract monitoring systems ensuring that projects are completed on time and within budget.

Application of Protective Coatings

- Airless Spray Painting
- Conventional Spray Painting
- Brush & Roller Painting

Wide Ranging Experience

Bridges and other waterway structures, tank farms, petrochemical plants, railway system infrastructure.

Comprehensive Technical Support

Coatings, surveys and analysis, coatings specification development, assessment of hazardous or toxic substances.

Accreditation

All Site Operatives are qualified under the Industrial Coatings Applicator Scheme (ICATS) approved by Correx Ltd and the Institute of Corrosion. We have in house Trainers. In addition, we have ICORR certified Paint Inspectors

Full Support Services

Encapsulation and environmental protection, traffic management systems, industrial cleaning systems.

Industrial

Tank Coatings

Hankinson Painting Group has vast experience of preparation and installation of specialist linings and coatings to meet the demands of the chemical environment.

All projects are subject to our dynamic Safety Policy along with British Standard Quality Assured Controls

Services Offered Include:-

- Preparations and Application of Epoxy Polyurethane Systems
- Preparations and Application of Fibreglass Layups
- Preparations and Application of Epoxy Glass Flake
- Preparations and Application of Vinyl Ester Flake Glass
- Matt Reinforced Vinyl Ester Flake Glass
- Trowel Applied Polyester Coatings

We have completed a significant number of industrial tanks and vessels in the UK and abroad.

Industrial

Industrial Insulating Coatings

Hankinson Painting Group are approved Specialist Applicators of Mascoat and offer a line of coatings that can be applied on many different pieces of equipment and machinery in any number of environments and facilities.

Products in the Mascoat Industrial family include:-

Mascoat Industrial-DTI – capable of thermally insulating up to 375°F (190°C), this coating is perfect for a myriad of applications. Personnel protection, energy savings and protection from Corrosion Under Insulation are just a few of the benefits.

Mascoat Industrial-AC (Anti-Condensation) – the first branch to come off of the Mascoat Industrial tree. AC is a coating that reduces or completely stops condensation from happening, depending on the thickness of the coating and the application.

Mascoat Industrial-HR (Highly Reflective) – perfect for tanks that need to be protected from solar loading, the coating has highly reflective particles to block the sun's rays from heating up the contents inside.

Used alone or together (in special circumstances), the Mascoat Industrial line of insulating coatings is able to solve many problems prevalent throughout an industrial facility from food processing to chemical refining.

Testimonial:

"Hankinson has proved time and time again they can deliver extensive quality and superior service. Mascoat is extremely glad to have Hankinson as our Approved Applicator for our complete range of coatings. We already have some very exciting projects under our belt and we are looking forward to all future projects with the Hankinson Painting Group."

Ralph Maas

Business Development Manager, Mascoat

Factory Facility

Factory Facility

Based in Ellesmere Port, we have the facility to prepare and complete coatings to a vast range of steel and steel structures prior to delivery to site. The factory facility provides over 50,000 sq ft of internal operating space with easy access to the motorway network.

We operate a quality control system accredited to British Standards as well as a dynamic Safety Policy, ensuring complete client satisfaction.

Services offered include:-

- Shot Blasting
- Grit Blasting
- Powder Coatings
- Flame Metal Spraying
- Blast Cleaning
- Glass bead Cleaning

- Epoxy & Polyurethane Coatings
- Pipe Lining
- Pipe Wrappings
- Environmentally Controlled Coatings
- NHSS19A Coatings for Site Works

Facilities available include:-

- Craneage
- Handling Capacity
- Spraying Booths
- Heat Treatment Facilities

- Pipework Storage & Handling
- Surface Treatment Facilities
- Road Trailer Storage

Specification familiarity:-

We see our expertise used by our clients to support valid design proposals by providing research from our suppliers to develop practical solutions to coatings which require application under controlled conditions. The staff are familiar with high quality specifications, exacting standards of application, and management systems which provide a focus on "right first time - every time". This Company philosophy has enabled us to build strong relationships with clients from the engineering sectors which provides us with the ability to give confidence to partners and assurance to our clients in our empathy with their business, commercial, community, and environmental objectives.
